Summary

Product-focused Frontend / Full Stack Engineer with 4 years of experience building scalable, performant, and user-centric applications. Strong expertise in Next.js, React, TypeScript, Node.js, and modern tooling. Experienced in working on high-impact features, optimising large legacy codebases, and leading development teams. Known for fast learning, ownership, and delivering reliable solutions across multiple domains.

Skills

Frontend: Next.js, React.js, Typescript, JavaScript, TailwindCSS, Material UI, HTML5, CSS3, Web Performance Optimisation
Backend: Node.js, Express.js, Sequelize, Python, FastAPI, REST APIs, Microservices
Database: PostgreSQL, MySQL, MongoDB, Firebase
System & Architecture: API Design, Caching Strategies, Scalability, Design Patterns, Monitoring & Logging
Testing & Tools: Jest, Vitest, Playwright, Git, CI/CD, Docker, Vite, Webpack

Professional Experience

Software Development Engineer — Frontend
December 2024 – Current

Cibirix Digital Media Private Limited, Indore

- Built a Twilio-powered real-time screensharing system (Teams/Meet-like) enabling smooth collaboration with low latency.
- Developed an internal CRM for the 3D metal building platform; improved QA efficiency by 40% using TDD (Vitest + Playwright), SSR, and optimised BFF architecture.
- Refactored the legacy React 3D metal building app by introducing a **modular architecture**, migrating class components to functional, and applying performance optimisations (lazy loading, Suspense, bundle reduction).
- Migrated the project from Webpack to Vite, cutting build time by over 60% and improving developer productivity.

Software Development Engineer - Tech Lead
April 2024 – November 2024

Techdome Private Limited, Indore

- Led a team of 5 developers, handled task planning, code reviews, and client requirement breakdowns.
- Built Supaloops, a Google Meet & Microsoft Teams extension for AI-powered meeting notes—implemented both frontend and backend integrations.
- Contributed to the in-house ERP (Catalyst) by adding modules (Leads, Customers, Orders) and writing backend microservices in Python FastAPI.
- Improved SalemSeats, a large legacy React app, by adding caching (similar to RTK), optimising API usage, and enhancing UI/UX—resulting in 30–40% faster interactions.
- Represented the company at campus drives, including IIT Indore, conducting interviews and technical evaluations.

Software Developer
June 2022 - Feb 2024

Sleeksky Private Limited, Bengaluru

- Built Taskivities, an internal productivity tool, tracking daily developer activities and improving team reporting.
- Designed and delivered the complete Anumo micro-finance app MVP—end-to-end feature development, backend APIs, and deployment.
- Enhanced the existing SleekCMS by fixing core bugs, adding drag-and-drop content reordering, and migrating the entire codebase to TypeScript.
- Contributed to Exxat, integrating a custom micro-frontend module into their main healthcare application.

Projects

3D Metal Building Platform: Optimised a large-scale 3D rendering React application with better modularity, performance, SSR usage, and faster builds with Vite.
Supaloops Extension: Built an AI note-taking browser extension integrating with Google Meet / Microsoft Teams; managed frontend logic, API orchestration, and real-time event handling.
Anumo Micro-Finance App: Developed a fully functional micro-finance MVP with user onboarding, loan management, and backend services.

Education

BCA
July 2019 - Apr 2022

DAVV, Indore

Accomplishments & Activities

Built and scaled a tech YouTube channel to 14K+ subscribers, creating educational content on programming and tech topics.
